

## What is the idea of the IO?

The primary aim of the IO is to develop a Train-the-Trainer (TtT) framework to effectively disseminate data literacy content to wide audiences.

## What are the goals of the IO?

The main goal of this model is to prepare instructors to present information effectively, respond to participant questions, and lead activities that reinforce learning. By utilizing blended learning, which includes e-learning and person-person teaching, interactivity and discussion is reinforced in order to foster thought-provoking conversations, critical thinking and active participation.

## How was the IO implemented?

The work in this IO was a group effort, Partners provide good practice examples from their teaching activities to enhance the T-t-T toolkit and method.

**TRAIN-THE-TRAINER  
CONCEPT**

**IO 2**

**E. GÖRÖGH,  
J. FAZEKAS-PARAGH**

## What are the results of the IO?

The **main output** is a T-t-T programme including

- an e-learning course material
- a teaching handbook
- toolkit

The **structure** of the programme follows a modular principle. Each module is centred on a primary competence the programme wishes to educate on (data tools, data ethics, data culture and critical thinking).

The curriculum is organized in **different modules** (learning blocks) which can be arranged and rearranged to meet the specific needs of participating individuals and groups.

## What are ideas for future developments?

The main objective is to produce sustainable results.

After the end of the project the aim is

- to put the T-t-T programme outcomes into practice
- and include them in existing curricula at university level.

## ***Train the Trainer***

Goal of the trainer
